[LinkedIn](#) | [GitHub](#) | [Sujal Verma - Portfolio](#)

Skills

- ❖ **Programming Languages:** Java, Python, HTML5, CSS3, JavaScript (ES6+), React.js, Node.js
- ❖ **Databases:** SQL(MySQL), MongoDB, Adv. Database Management System, Web Sockets.io
- ❖ **Frameworks & Tools:** Version Control (Git & GitHub), Linux, RESTful APIs, Postman API, n8n
- ❖ **Core CS Concepts:** DSA(Java), Mathematical Analytics, OS, DBMS, Computer Networks, Network Security

Education

- ❖ Shree L.R. Tiwari College of Engineering, Mumbai | BE | IT | **SGPA (SE): 7.83** Aug 2024 – Present
- ❖ Matruhaya Jr. College of Science, Mumbai | XII (HSC) | **69.50%** February – 2024
- ❖ DR. H.B. Mishra English High School, Mumbai | X (SSC) | **82.00 %** March – 2022

Work Experience

CodTech IT Solutions Private Limited - [\[Certificate\]](#)

Dec 2025 - Jan 2026

- Built a real-time chat application and a collaborative document editor using Socket.io and WebSockets for seamless live communication.
- Developed a responsive web interface and a productivity-focused Chrome extension to fetch API data and track user analytics.
- Integrated robust backend systems using Node.js and Python with MongoDB/PostgreSQL for efficient data storage and management.

Tech Stack Used: React.js, Node.js, Python, MongoDB, PostgreSQL, Socket.io, and REST APIs.

Cyber Security Intern (Inhouse): SLRTCE, Mumbai

June 2025 – July 2025

- Developed a real-time malware scanning tool using Python, improving detection speed by 20%.
- Use Cases of Cybersecurity & Threats (malware, phishing, ransomware, DDoS attacks, etc.)
- Implemented the Networking & Security- TCP/IP, Firewalls, VPNs, Proxy servers.

Tech Stack Used: Python, TCP/IP, Firewalls, VPNs, Proxy Servers

Projects

❖ **GuardianRoute – Intelligent School Transport System**

[Demo](#) | [GitHub](#)

Tech Stack: Node.js, Express.js, Socket.io, Leaflet.js, MongoDB Atlas, HTML5 Geolocation API

- Developed a hardware-free, real-time tracking system for Mira-Bhayandar schools using Socket.io to ensure zero-latency location updates between drivers and administrators.
- Engineered an intuitive Parent Dashboard with Leaflet.js map integration, providing live travel status and automated pickup/drop notifications to enhance safety transparency.

❖ **Verity AI – AI Auditing & Hallucination Detection – Hackathon, NMIMS GDG Cloud Mumbai**

[Demo](#) | [GitHub](#)

Tech Stack: Python, Node.js, Express.js, MongoDB Atlas, Google Cloud API, JWT Authentication, HTML5/CSS3.

- Developed an independent auditing layer for Generative AI that scans model responses in real-time to detect hallucinations and factual inconsistencies using a custom multi-layer evaluation engine.
- Engineered a proprietary "Gen Score" (0–100) metric and risk classification system (Allow/Review/Block) to quantify AI reliability and automate content moderation for enterprises and developers.

❖ **Student Task Manager – Productivity Dashboard - MERN Stack**

[Demo](#) | [GitHub](#)

Tech Stack: React (Vite), Recharts, Axios, React Router, MongoDB Atlas, Google Generative AI (Gemini 1.5 Flash).

- Developed a full-stack academic planner using the **MERN stack** to streamline task management with gamified elements and secure **JWT authentication**.
- Integrated **Google Gemini AI** to auto-generate actionable sub-tasks from study goals and implemented **Recharts** for real-time visual analytics of completion status.

❖ **Eco-Detect – Smart Plant Disease Detection - Full Stack AI Web App**

[Demo](#) | [GitHub](#)

Tech Stack: React, TypeScript, Tailwind CSS, OpenAI Vision API (or relevant API).

- Developed a smart web app using AI and Image Processing to detect and classify plant diseases from leaf images.
- Implemented an image upload feature for instant analysis, classifying plant conditions as 'Healthy' or 'Diseased'.

Certifications & Achievements

❖ Participated in Build with AI Bootcamp- Antigravity , Google for Developers H2S	April – 2026
❖ H.E.A.T 1.0: Ignite Innovation 24-Hr Hackathon, Atlas SkillTech University	March – 2026
❖ Shortlisted for Build & Grow AI Hackathon 2.0 – NMIMS, GDG Cloud Mumbai	Jan – 2026
❖ SuperHack 2025 (Global AI Hackathon), SuperOps , in collaboration with AWS & Hack2skill	Jan – 2026
❖ Walmart Global Tech – Advanced Software Engineering Job Simulation (Forage)	Jan – 2026
❖ Gemini in Google Cloud – Google AI Labs, Mumbai	Oct – 2025
❖ Hackathon: Participated in Smart India Hackathon, Hack the Web by Unstop	Sept – 2025
❖ GenAI Certification– Simplilearn	July – 2025

Position of Responsibility

-
- ❖ **Information Technology Student Association (ITSA)** – Committee Member
